

Courses Taught

[EPI-C501 Epidemiology Methods I](#)

This course offers intensive training in epidemiologic research methods, including measures of disease frequency, measures of association, disease surveillance, causal inferences, experimental and quasi-experimental study designs and screening.

[EPI-C601 Advanced Epidemiology Methods](#)

The purposes of this course are to develop the practical statistical skills to analyze an epidemiologic data set, and to learn to write a scientific paper in the form of a journal article from the results of epidemiologic data analysis.
